Internal Control

External Control

Internal
Responsibility

I shape my future - I have control of my life
I can make changes to Society and my environment if I want to. I can influence policy and I am to be held responsible to societal rules.

I cannot influence my future - Things happen randomly or unpredictably. Whenever I try to work toward something I am never sure of the results. I should abide by society rules and be held accountable by it

External
Responsibility

I shape my future and have control of my life but have no say about what happens in the community. I don't feel obligated to follow what the system says. The system always wins.

I have no control of my life and have no say about what society does with me. No matter how much I try, my future does not depend on my actions and I have no say in what the system does to me. I am not responsible to follow directives.
